SADIQ ALI

Full-Stack Developer | Frontend Engineer | Interactive UI & AI Automation

Chennai, Tamil Nadu, India | +91 9791622030 | sadiqilaqidas@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Full-Stack Developer specializing in frontend performance, scalable backends, and interactive web experiences. Proven track record in shipping live production systems, optimizing cloud networks, resolving critical async race conditions, and deploying AI/Computer Vision control layers.

TECHNICAL SKILLS

Languages & Core:	JavaScript (ES6+), Python, SQL, HTML5, CSS3
Frontend & 3D Web:	React.js, Next.js, Three.js, React Three Fiber, WebGL, React Native, Expo, Tailwind CSS
Backend & Cloud:	Node.js, Express.js, REST APIs, Supabase, Firebase, MongoDB, Cloudflare, Brevo
AI, CV & DevOps:	Computer Vision (OpenCV, MediaPipe), LLM Integration, Prompt Engineering, Git, CI/CD

PROFESSIONAL EXPERIENCE

Software Associate — *Zainova (Dubai, UAE)* **Feb 2026 – Present**

- Engineered end-to-end customer features from technical specifications through UI implementation, backend workflows, and deployment.
- Resolved high-priority production bugs by identifying root causes across full-stack components, backend APIs, and database state layers.

Web Developer — *RoboVision Pvt Ltd (Chennai, India)* **Aug 2025 – Feb 2026**

- Built high-performance web applications with responsive state management, third-party API integrations, and smooth animation UX.
- Developed interactive 3D web environments using **Three.js** and **WebGL**, embedding custom models into dynamic layouts.

SELECTED PROJECTS

JerseyVerse — Full-Stack E-Commerce Platform **Live Application**

Tech Stack: React, Next.js, Supabase, Brevo, Cloudflare

- Deployed a production e-commerce platform and configured **Cloudflare** edge rules to reduce origin log overhead by **50%**.
- Eliminated checkout payment race conditions and email dispatch errors by restructuring async handling with `Promise.allSettled`.

New Crescent Builders — Business Platform & Admin CMS **Live Platform**

Tech Stack: React, Next.js, Node.js, Supabase, Tailwind CSS

- Architected a construction platform featuring an admin CMS for live project management and automated client workflows.
- Engineered real-time pricing calculation models driven by complex input variables directly mapped to commercial pricing logic.

IsmailArc — Interactive Architectural Showcase **Live Portfolio**

Tech Stack: React, Next.js, Tailwind CSS, Map APIs

- Designed a responsive portfolio showcasing 10+ architectural projects using custom CSS Box Model layouts and interactive map integrations.
- Optimized dynamic image loading and layout rendering to ensure seamless multi-device responsiveness.

SmartPlug — IoT & Computer Vision Automation Control **Mobile App**

Tech Stack: React Native, Expo Go, Firebase, OpenCV, MediaPipe

- Developed a cross-platform mobile app for real-time hardware automation supporting ESP/Arduino microcontrollers.
- Integrated **OpenCV** and **MediaPipe** gesture recognition to enable hands-free computer vision control modes.

Interactive 3D Web Portfolio **Live Portfolio**

Tech Stack: Three.js, React Three Fiber, WebGL

- Built an interactive 3D web experience utilizing custom GLTF models, scene lighting, and camera path animations.
- Engineered responsive fallback rendering routines to maintain optimal 60 FPS performance across desktop and mobile browsers.

EDUCATION & CERTIFICATIONS

B.Tech in Computer Science and Engineering
BSA Crescent Institute of Science and Technology, Chennai, India
Graduation: 2026 | CGPA: 8.5+

Certifications:

- AI/ML — IBM
- Generative AI for Software Dev — Coursera
